

SENECA™

Perfect Fit. Perfect Finish.

Beauty is
in the **Details**

Perfectly Edged Treads.

Stair Treads That Reflect Your Personal Style

We'll find your match! We have many different species in stock to coordinate with your flooring, including red oak, white oak, hickory, maple, birch, walnut and jatoba.

Make it your own! In addition to the traditional rounded bullnose edge, choose from square, eased, chamfered and double chamfered edge options for a personal touch.

Add style! We can match your flooring with a number of specialty applications such as glazing, wire brushing and sculpting. We will match your floor's finish too – from ultra matte to high gloss.

Built to last! Treads are hand-finished with a durable, water-based, phthalate-free formulated polyurethane topcoat finish.

Stair Treads Built to Last

Combining quality, experience and the finest materials, Seneca Millwork's stair treads are unmatched in the industry. Our treads, available in a variety of styles and species, can be prefinished or finished on the jobsite. Visually, our treads are unique with solid edge-glued construction with only two to three glue lines per tread.

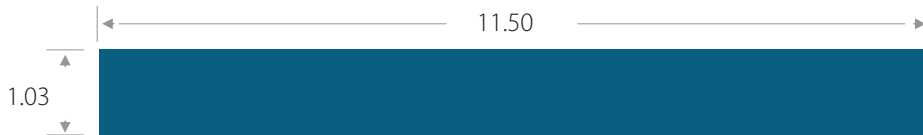

Other Features Include:

- A full 1-1/16" thickness for long-term strength and durability
- 11-1/2" deep treads, available in widths from 36" to 90"
- Matching risers are 3/4" thick, 7-1/2" in height, and range from 36" to 90" in width (risers can be purchased unfinished, primed or stained)
- Tread styles include straight (boxed-in), left or right single returns and double returns
- Starter steps are available in right, left or double radius styles (starter steps are not available with double chamfered edges)
